The Accucold Difference

Accucold, a division of Felix Storch, Inc., specializes in manufacturing purpose-built refrigeration products for the medical, pharmaceutical, laboratory, and institutional industries. Our extensive product selection offers a range of cooling solutions, from basic locking compact refrigerators to built-in vaccine storage units specially designed to comply with **CDC and VFC guidelines with rapid shipping of stocked products.** We are **ISO 9001:2015 certified** and maintain an **ISO/IEC 17025:2017 certified** calibration laboratory for our monitoring equipment, including the industry's largest selection of equipment certified to the **NSF/ANSI 456 Vaccine Storage Standard**.

Performance Series Refrigeration

Solid & glass door choices from 1 to 49 cu.ft.

Purpose-built with advanced features to help support CDC and VFC guidelines for proper vaccination storage:

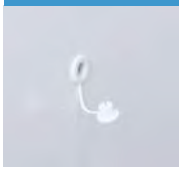

- Audible alarms for hi/lo temp., power out, & open door
- Keyed lock for secure interior
- Intelligent microprocessor control panel with password protection
- Optimized forced air cooling for fast temp. recovery
- Digital display of the current & hi/lo temp.
- Silver ion-coated handle provides protection from germs & microbes
- LED lighting for an efficient display
- Self-closing user-reversible door
- Adjustable plastic-coated wire shelves
- Durable interior construction from powder-coated steel

- Remote contacts

- Access port

- Buffered probe in glycol-filled bottle

100% GUARANTEE — **EXTENDED WARRANTY**
- 2-year parts & labor
- 5-year compressor

ECO-FRIENDLY — Environmentally friendly hydrocarbon refrigerants

COMPATIBLE with Pyxis®, Omnicell®, & AcuDose RX®

ADA HEIGHT OPTION — **ADA OPTION** 32" high choices for use under lower ADA compliant counters

Adjustable operating control range: 2 to 8ºC • Temperature variation: +/- 1ºC*

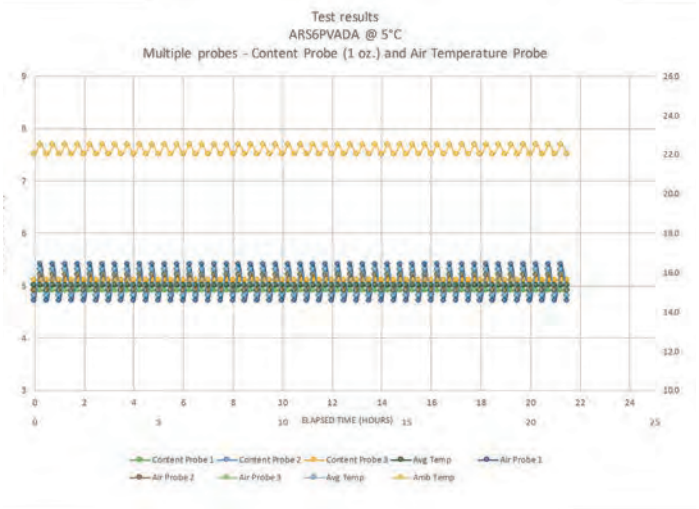

*The published temperature variation is derived from the maximum deviation of an NTC sensor in a 1 oz. vial located nearest the chamber geometric center during a 24-hour test period

MED/LAB/PHARMACY REFRIGERATION

Accucold's Performance Series features purpose-built equipment specially designed and constructed to meet the demanding storage needs of medical, laboratory, vaccine, and life science applications.

Performance Series

Professional Grade Performance for Pharmacy, Patient Care, Life Science, & Laboratories

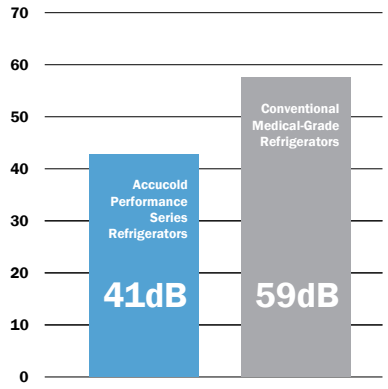

Advanced Temperature Control

Stability and Uniformity - Intelligent control system utilizes an advanced system design to ensure limited deviations from the setpoint and uniform temperatures throughout the entire unit.

Rapid Recovery - Optimized air flow for fast temperature recovery after door openings.

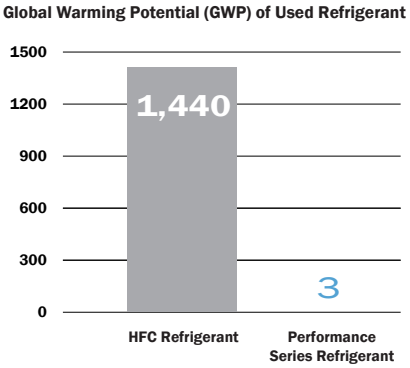

Whisper QUIET

Noise Reduction Design - Preferred by noise-sensitive areas of a pharmacy, patient care facility, or laboratory. Accucold's Performance Series refrigerators are up to 3x quieter than traditional models.

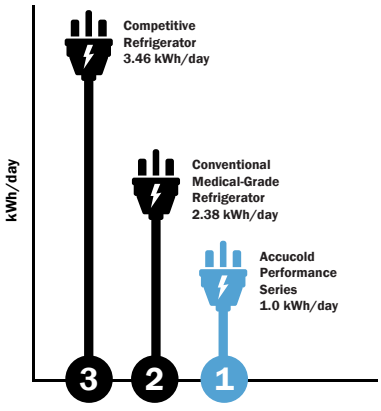

Green Natural Refrigerants

Earth-Saving Natural refrigerants are environmentally-friendly with no impact on ozone depletion and minimal global warming potential.

Energy Conservation

Energy Savings - Natural refrigerators provide up to a 15% reduction in energy use. When combined with intelligent control, advanced system design, and optimized air flow, this results in potentially more than 50% in energy savings over competitive units.

New Options for Optimized Storage & Security

Ventilated Drawers

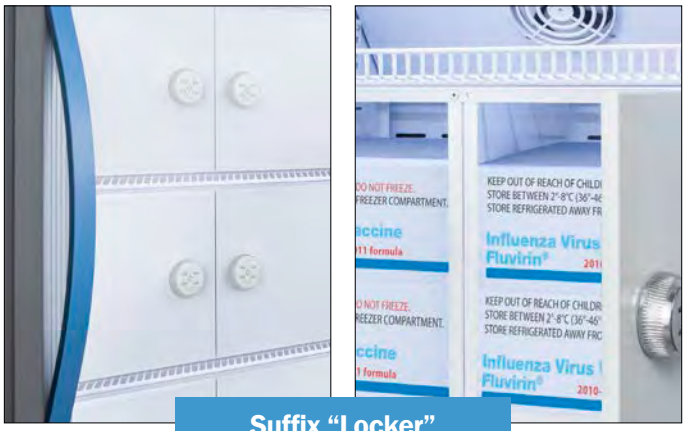

Full-extension removable drawers made from powder-coated aluminum, factory-installed in any 24" wide Pharma-Vac or Med-Lab refrigerator

Suffix "DR"

Locker Compartments

Interior lockers secured by combination locks for separated storage. Staff can set their own security code and override with provided keys

Suffix "Locker"

Keyless Access Locks

No keys required with a keypad security system that allows you to program up to 19 codes to accommodate your staff. Available as a factory-installed option on all Performance Series units

Add Option "KAL"

Digital Data Loggers

NIST calibrated loggers now available for wifi/bluetooth enabled notifications,as well as our original USB design. All DDLs ship with a certificate of calibration and feature an external readout of the current and min/max temperatures.

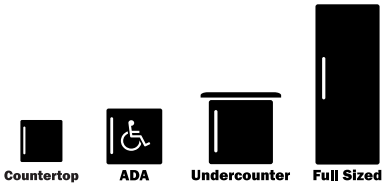

USB Logger: Add Option "DL2B"
Single Channel WiFi: Add Option "DL11BWiFi"
Dual Channel WiFi: Add Option "DL22BWiFi"

All units can be combined with Accucold freezers using our stacking racks

***Specifications are subject to change without notice. For the most current information, visit accucold.com**

Pharma-Vac Performance Series Refrigerators

Purpose-built for pharmacy, medication, and vaccination applications
to support meeting **CDC/VFC vaccine storage guidelines**

Advanced Temperature Control

Intelligent microprocessor digital temperature controller
Improved temperature accuracy with a buffered probe in glycol-filled bottle to simulate temperature of stored product
Additional sensor reads interior air temperature for superior temperature control
Adjustable operating control range from +2°C to +8°C (+35.6°F to +46.4°F)
Digital display of the min/max temperature (updated in 15 minute increments)
Temperature viewable in Celsius and Fahrenheit to the nearest tenth of a degree
Password protection of control parameters beyond setpoint
Optimized forced air cooling for excellent temperature stability and uniformity with rapid recovery after door openings and product loading

Multiple Alarms For Safer Monitoring

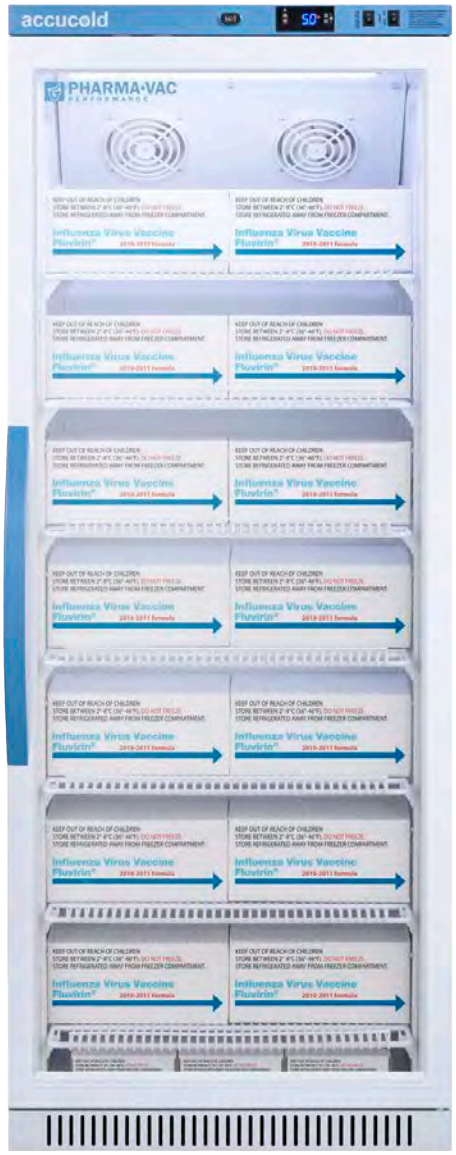

Audible/visual alarms for high/low temperature excursions
Open door alarm sounds if the door is left ajar
(default 4 minutes with selectable 1-99 minute range)
Audible power failure and sensor failure alarms
Mute function for alarms
Remote alarm contacts in rear of the unit

Fully Featured Interior For Convenient Storage

Energy efficient LED lighting with internal on/off switch
Adjustable plastic-coated wire shelves for improved circulation
Multiple shelf positions spaced at ½" to allow flexible adjusting to support smaller items
Adjustable cycle defrost operation
½" probe port included to accept user-provided monitoring equipment

Quality Design For Reliable Performance

Hospital grade cord with a green dot plug
Antimicrobial silver ion-coated handle for added protection from germs
Self-closing door offers added storage protection
User-reversible door swing (self-closing function compatible with RHD position only)
Environmentally-friendly natural hydrocarbon refrigerant for reduced global warming potential
Meets EPA and SNAP requirements
Convenient security with a top-mounted door lock (2 keys included)
Magnetic gaskets to ensure a positive seal
Compatible with Pyxis®, Omnicell® and AcuDose RX®

SKU: ARG12PV

Remote contacts

Temperature sensor in glycol bottle

Microprocessor digital temperature control

Performance Series

Refrigeration Certified to NSF/ANSI 456 Vaccine Storage Standard

Purpose-built Pharma-Vac series tested and **approved by an ANSI accredited laboratory** to conform to the latest industry standard

NOTE: This unit has the same feature packages as the Pharma-Vac series (page 6-7) but include a 2-year certificate of calibration. Products in this series have been tested and certified to NSF/ANSI 456.

Temperature excursions can affect the viability of vaccines, so choosing the right refrigerators and freezers that have been designed and purpose built for the application is extremely important. They must also be tested and approved for vaccine storage to help ensure vaccine viability and provide a high level of safety.

A new standard was developed by the NSF Joint Committee (comprised of CDC Members and manufacturing/pharmaceutical experts) on Vaccine Storage. This new NSF/ANSI 456 Vaccine Storage Standard was created to help define temperature performance attributes for vaccine storage units and to challenge refrigerators and freezers manufacturers with testing and performance protocols designed around real-world use applications common in demanding healthcare environments.

Testing includes confirming temperature performance during a series of short, frequent door openings to simulate regular use, as well as long, extended door openings to simulate events such as inventory counts or cleaning that may require the door to remain open for up to several minutes.

The standard acknowledges that how vaccines are loaded into refrigerators and freezers may affect performance, so units must pass performance criteria loaded and unloaded. In addition, all potential storage locations are considered to ensure there are no hot or cold spots that may allow vaccines to go out of CDC recommended temperature ranges. Temperature measurements are taken in 15 locations during the testing to confirm consistent performance.

With the new standard published, vaccine refrigerator and freezer manufacturers may now submit their equipment to third-party ANSI-accredited labs that can test and certify equipment to the NSF/ANSI 456 Vaccine Storage Standard. Accucold is proud to lead the industry with the largest line of cold storage product sizes certified to NSF/ANSI 456 Vaccine Storage* standard. The Performance-456 Series supports meeting regulations and guidelines from the CDC, State Agencies, World Health Organization, and other health ministries on vaccine storage and handling.

The Purpose-Built Performance Series delivers the performance and quality you need, in addition to the tight temperature control, low sound and exceptional features to meet the most demanding cold storage applications.

***Note for NSF/ANSI 456 compliance, units must be ordered with a certificate of calibration as designated by "456" in the model number.**

Pharma-Vac Performance Series Freezers

Designed and purpose-built for pharmacy, medication, and vaccination applications to support meeting **CDC/VFC vaccine storage guidelines**

Advanced Temperature Control

Intelligent microprocessor digital temperature controller
Improved temperature accuracy with a buffered probe in glycol-filled bottle to simulate temperature of stored product
Additional sensor reads interior air temperature for superior temperature control
Adjustable operating control range from -30°C to -10°C (-22°F to +14°F)
Digital display of the min/max temperature (updated in 15 minute increments)
Temperature viewable in Celsius and Fahrenheit to the nearest tenth of a degree
Password protection of control parameters beyond setpoint

Multiple Alarms For Safer Monitoring

Audible/visual alarms for high/low temperature excursions
Open door alarm sounds if the door is left ajar (default 4 minutes with selectable 1-99 minute range)
Audible power failure and sensor failure alarms
Mute function for alarms
Remote alarm contacts in rear of the unit

Fully Featured Interior For Convenient Storage

Energy efficient LED lighting with internal on/off switch
Adjustable plastic-coated wire shelves for improved circulation
Multiple shelf positions spaced at ½" to allow flexible adjusting to support smaller items
Static manual defrost cooling
½" probe port included to accept user-provided monitoring equipment

Quality Design For Reliable Performance

Hospital grade cord with a green dot plug
Powder-coated handle with naturally occurring silver ions to reduce the spread of germs
Self-closing door offers added storage protection
User-reversible door swing (self-closing function compatible with RHD position only)
Environmentally-friendly natural hydrocarbon refrigerant for reduced global warming potential
Meets EPA and SNAP requirements
Convenient security with a top-mounted door lock (2 keys included)
Magnetic gaskets to ensure a positive seal
Pyxis®, Omnicell® and AcuDose RX® compatible

Pharma-Lab Performance Series

Countertop | ADA | Undercounter | **Full Sized**

Refrigerators and freezers designed and **purpose-built to meet the demanding needs for pharmacy, medication, vaccine, laboratory, and life science applications**

Advanced Temperature Control

Intelligent microprocessor digital temperature controller
Precise temperature control supports meeting the CDC/VFC storage guidelines
Improved temperature accuracy with a separate temperature probe for continuous product readout
Additional sensor reads interior air temperature for superior temperature control
Adjustable operating control range; Refrigerators: +2°C to +10°C (+35.6° F to +50° F)/ Freezers: -30ºC to -15ºC (-22ºF to +5ºF)
Digital display of the min/max temperature (updated in 15 minute increments)
Temperature viewable in Celsius or Fahrenheit to the nearest degree
Optimized forced air cooling for excellent temperature stability and uniformity with rapid recovery after door openings and product loading

Multiple Alarms For Safer Monitoring

Audible/visual alarms for high/low temperature excursions
Open door alarm will sound at different levels when the door is left ajar for times starting at 30 seconds
Condenser cleaning alarm sends audible and visual signal every six months

Fully Featured Interior For Convenient Storage

Adjustable plastic-coated wire shelves for improved circulation
Multiple shelf positions spaced at 1/2" to allow flexible adjusting to support smaller items
Interior LED lighting for an energy efficient presentation
Adjustable cycle defrost operation

Quality Design For Reliable Performance

Complete stainless steel construction inside and out for easier cleanup
Glass door models feature anti-condensate door frame heater to ensure a clear view
Self-closing door helps to protect contents, but will also remain open when the door is opened at a 90º angle for easier loading
Ships with 6" high commercial locking casters for optional installation
Factory-installed locks located towards the top of the unit for convenient security
Sealed back for a space-saving design that's easier to clean
Environmentally-friendly natural hydrocarbon refrigerant for reduced global warming potential
Meets EPA and SNAP requirements
Quality door gaskets ensure a tight seal for energy savings and improved performance

User manual

DESIGNED TO PROVIDE +/-1°C VARIATION
The published temperature variation is derived from the maximum deviation of an NTC sensor in a 1 oz. vial located nearest the chamber geometric center during a 24 hour test period.

Extended Warranty
2-year parts & labor
5-year compressor

Eco-Friendly
Uses environmentally friendly hydrocarbons for a greener footprint

Compatible
with Pyxis®, Omnicell®, & AcuDose RX®

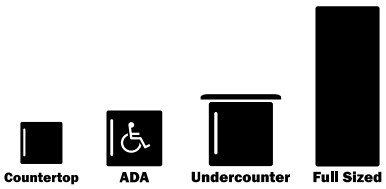

Logging Option
DDLs available for cloud or USB-based outputs

Manual Defrost All-Freezers & All-Refrigerators

Popular sizes from countertop to large capacity for static cooling operation in pharmacy, life science, and industrial storage applications.

Features

Static manual defrost operation with no internal fans
Factory-installed locks for added security
Adjustable shelves or slide-out baskets
Audible high/low temperature alarms
External readout of the current and min/max temperatures
Access port included for additional monitoring equipment
Thick insulation and magnetic gaskets to ensure a quality seal

Refrigerator-Freezer Combinations

Pharma-Vac refrigerators stacked with Performance freezers create all-purpose. combinations that provide reliable storage in slimmer fitting footprints

Countertop ADA Undercounter **Full Sized**

Features

New full-size single unit dual compressor choices (ARFS/G series)
Easy assembly with our stacking rack
Takes up less than 24" of floor space for an easier fit in facilities
Fully featured with our Performance Series packages
Access ports included with both units
External temperature readout as recommended by the CDC
Independent refrigerator and freezer operation for optimum performance
High/low temperature alarms installed in both units
Locking doors with separate keys
Extended warranty with 2 years parts & labor/5 years compressor

StackRack lets you combine virtually any two units

Ultra Low Temperature Chest Freezers

Made in Denmark, our -85°C chest freezers offer reliable ultra low temperature storage for biological samples, **DNA/RNA material, chemics, select vaccines**, and other substances with **strict temperature requirements**

Low Temperature Storage

Digital control panel allows you to manage the temperature between -50 and -85°C
Temperature viewable in Celsius or Fahrenheit to the nearest tenth of a degree
Fast pull-down time of 3 hours from ambient temperature
Power-out alarm powered by a 9V battery audible warns of power failure

User-Friendly Features

Pre-installed casters allow easy mobility
Counterbalanced hinges to ensure safer loading
High/low temperature alarm audible warns if the interior goes out of range
Defrost drain in front for easy maintenance as needed
Vertical box shelf option for added storage convenience

Quality Design For Reliable Performance

Factory-installed lock for convenient security
Inner lids included for added protection when loading the freezer
Hermetically sealed compressor ensures lasting durability in busy facilities
Extra thick insulation with 4 ½" thick walls
Advanced design features 8 layers of D-shaped cooling pipes to improve efficiency

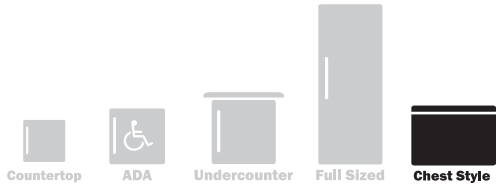

SKU: LAB11R9 includes 6 10-box shelves and 3 5-box shelves

Low Temperature Freezers

From laboratory research to veterinary storage, Accucold's **-45ºC** freezers serve a variety of storage functions in a range of sizes to fit any facility's space

Low Temperature Storage

Digital control panel for easy temperature management
Advanced design for maximum efficiency
Pre-installed access port to accept monitoring equipment

Variety of Sizes & Styles

28" to 67" wide options

User-Friendly Features

Pre-installed casters allow easy mobility (select units)
Counterbalanced hinges to ensure safer loading
High/low temperature alarm audible warns if the interior goes out of range
Defrost drain in front for easy maintenance as needed

Quality Design For Reliable Performance

Factory-installed lock for convenient security

Controlled Room Temperature

Performance Series Cabinet

Countertop | ADA | Undercounter | Full Sized

Designed and **purpose-built** for ambient medication and vaccine storage in pharmacy and patient care areas

Advanced Temperature Control

Intelligent microprocessor digital temperature controller
Improved temperature accuracy with a buffered probe in glycol-filled bottle to simulate temperature of stored product
Additional sensor reads interior air temperature for superior temperature control
Adjustable operating control range from 68° to 77°F (20°C to 25°C)
Digital display of the min/max temperature (updated in 15 minute increments)
Temperature viewable in Celsius and Fahrenheit to the nearest tenth of a degree
Password protection of control parameters beyond setpoint
Optimized forced air cooling for excellent temperature stability and uniformity with rapid recovery after door openings and product loading

Multiple Alarms For Safer Monitoring

Audible/visual alarms for high/low temperature excursions
Open door alarm sounds if the door is left ajar (default 4 minutes with selectable 1-99 minute range)
Audible power failure and sensor failure alarms
Mute function for alarms
Remote alarm contacts in rear of the unit

Fully Featured Interior For Convenient Storage

Energy efficient LED lighting with internal on/off switch
Adjustable plastic-coated wire shelves for improved circulation
Multiple shelf positions spaced at ½" to allow flexible adjusting to support smaller items
Adjustable cycle defrost operation
½" probe port included to accept user-provided monitoring equipment

Quality Design For Reliable Performance

Hospital grade cord with a green dot plug
Antimicrobial silver ion-coated handle for added protection from germs
Self-closing door offers added storage protection
User-reversible door swing (self-closing function compatible with RHD position only)
Environmentally-friendly natural hydrocarbon refrigerant for reduced global warming potential
Meets EPA and SNAP requirements
Convenient security with a top-mounted door lock (2 keys included)
Magnetic gaskets to ensure a positive seal
Compatible with Pyxis®, Omnicell® and AcuDose RX®

SKU: ARG12PV-CRT

Performance **CRT** **CONTROLLED ROOM TEMPERATURE** 72°F

Technical Specifications (All Units):

Defrost type: Cycle
Thermostat: Intelligent microprocessor digital
Temperature sensors: 2 (air probe & buffered probe)
Adjustable operationg control range: 68° to 77°F (20°C to 25°C)
Temperature variation: +/- 1.5°C*
Shelving: Adjustable white plastic coated wire
Voltage: 115V/60 Hz
Cord: NEMA 5-15P
Lock: Factory-installed key lock
Refrigerant: Eco-friendly R600a or R290a
Light: LED
Access port: ½"

Door: Reversible
Fan: Internal
Certifications: ETL, ETL-C
Parts & Labor Warranty: 2 years
Compressor warranty: 5 years

Included with units:

2 keys
Do Not Unplug removable sticker
Do Not Adjust Temperature removable sticker
Do Not Store Personal Items removable sticker
User manual

DESIGNED TO PROVIDE +/-1.5°C VARIATION
The published temperature variation is derived from the maximum deviation of an NTC sensor in a 1 oz. vial located nearest the chamber geometric center during a 24 hour test period.

Extended Warranty
2-year parts & labor
5-year compressor

Eco-Friendly
Uses environmentally friendly hydrocarbons for a greener footprint

Compatible
with Pyxis®, Omnicell®, & AcuDose RX®

Icemakers & Ice/Water Dispensers

Available in a range of sizes, to keep patients and staff hydrated.

Features

Tabletop ice/water dispenser ideal for hospital waiting areas
Optional filters for improved ice water purity
Commercially approved choices listed to NSF-12 standards
Drain-free choice (BIM25) for versatile installation
Choices available in a lower 32" height for use under ADA compliant counters
ENERGY STAR certified choices included
High capacity production on select models
Available with an internal pump or gravity drain system

Break Room Refrigerator-Freezers

Variety of choices equipped with NIST calibrated thermometers
that provide a continuous digital display of the current and high/low temperature

Countertop | ADA | Undercounter | Full Sized

Features

Factory-installed NIST calibrated thermometer
2-year certificate of calibration included for your records
Audible high/low temperature alarm
Digital temperature readout for each section
(refrigerator only for undercounter choices)
Frost-free operation in full-sized units
Adjustable shelving and door storage
Interior lighting in the fresh food compartment
User-reversible door swing to best accommodate any setting

Compact & Mid-Sized Microwaves

Commercially approved units and basic countertop microwaves for a variety of heating applications

Compact Mid-Sized

Features

Black, white, or stainless steel finish options
Commercially approved choices listed to NSF-4 standards
115V operation to work with standard outlets
Digital control pads for easy use
Savable settings for faster one-touch cooking
Can be ordered pre-mounted to virtually any Accucold or Summit refrigerator
USB ports on select items
Refrigerator-Microwave combinations available

SKU: SCM1000SS

SKU: SM903BSA

SKU: MRF34BSSA

MOMCUBE® Series Breast Milk Refrigeration

All-refrigerators specially designed for the unique needs of breast milk, with interior locking compartments to allow nursing mothers private storage

Purpose-Built for Breast Milk Storage

Designed to operate between 33 and 40°F for the proper storage of human milk
Individual locking compartments for secure, separate storage for ("LK" Series)
Combination locks allow each mother her own access system
Single key override included for staff to manage as needed
Audible/visual alarms for high/low temperature excursions
Open door alarm offers added assurance in office or hospital settings

Advanced Temperature Performance

Intelligent microprocessor digital temperature controller
Improved accuracy with a buffered probe in glycol-filled bottle to simulate temperature of stored bottles
Additional sensor reads interior air temperature for superior temperature control
Digital display of the min/max temperature (updated in 15 minute increments)
Password protection of control parameters beyond setpoint
Optimized forced air cooling for excellent temperature stability

Fully Featured Interior For Convenient Storage

Energy efficient LED lighting with internal on/off switch
½" probe port included to accept user-provided monitoring equipment

Quality Design For Reliable Performance

Hospital grade cord with a green dot plug
Antimicrobial silver ion-coated handle for added protection from germs
Self-closing door offers added storage protection
Environmentally friendly natural hydrocarbon refrigerant for reduced global warming potential
Meets EPA and SNAP requirements
Convenient security with a top-mounted front door lock (2 keys included)
Powerful magnetic door gaskets to ensure a tight seal for energy savings and improved performance

MOMCUBE Freezers:

Provide additional solutions for longer term storage.
These units come with a more basic featured package.

SKU: ARS8MLMCLK

Interior locking compartments allow private storage

Designed to maintain recommended temperature for breast milk storage

momcube®

SPRF11MC

ARS8MLMCLK

ARS15MLMCLK

Technical Specifications (Refrigerators*):

Defrost type: Cycle
Thermostat: Intelligent microprocessor digital
Temperature sensors: 2 (air probe & buffered probe)
Adjustable operating control range: 33 to 40°F
Temperature variation: +/-1.8°F*
Shelving: Interior locking compartments or adjustable white plastic coated wire
Voltage: 115V/60Hz
Cord: NEMA 5-15P
Lock: Factory-installed key lock + individual combination locks with single key override ("LK" Series)
Refrigerant: Eco-friendly R600a
Light: LED

Access Port: ½"
Door: Reversible
Fan: Internal
Certifications: ETL, ETL-C
Parts & Labor Warranty: 2 years
Compressor Warranty: 5 years

Included with units:
2 keys for outer door
2 keys to override combination locks
User manual

DESIGNED TO PROVIDE +/-1.8°F VARIATION
The published temperature variation is derived from the maximum deviation of an NTC sensor in a 1 oz. vial located nearest the chamber geometric center during a 24 hour test period.

Extended Warranty
2-year parts & labor
5-year compressor

Eco-Friendly
Uses environmentally friendly hydrocarbons for a greener footprint

Logging Option
DDLs available for cloud or USB-based outputs

LOCKERS
Individual storage compartments with combination locks

Product Options & Accessories

Virtually all Accucold refrigerators and freezers and be configured to meet the unique needs of any office, laboratory, clinic, hospital, pharmacy, or other institution.

NIST Calibrated Temperature Monitoring

Our ISO/IEC 17025:2017 certified laboratory allows us to calibrate temperature monitoring equipment to NIST standards in our own facilities, ensuring accurate temperature readings for your records.

OPTION: DL2BKIT

USB Digital Data Logger

Available installed on your equipment or for aftermarket use, the DL2B DDL with alarm provides virtually unlimited logging memory to record unit temperature to your user-set logging intervals. To help support meeting CDC/VFC guidelines, this logger also keeps the current and high/low temperature in view

OPTION: DLSA11CAL-24P

Portable Loggers

Available in 12 or 24 packs, the DLSA loggers are ideal for cold chain management during the transportation process, with an integrated USB to ensure easy record keeping with downloadable software

OPTION: DL11BWiFi

WiFi Enabled Digital Data Logger

Cloud monitoring solution provides instant data access and alert notifications to ensure you never miss a critical event.

DLPWR

Wireless Environmental Temperature Monitoring Device (ETM)

PharmaWatch wireless logging equipment for cloud-based data management, enabling users to access real-time and historical data, easily print audit-ready compliance reports, and receive temperature alert notifications via text, call, or email. Available for use with refrigerators, freezers, ultra lows, BOD incubators, refrigerator-freezers, and controlled room temperature cabinets.

Additional Options:

OPTION: DR

Interior Options
Full-extension ventilated drawers
Locking compartments for individual access
Security lock boxes with dial combination locks
Access ports with dry contacts
⅜" or ½" probe holes

OPTION: STACKING RACK

Exterior Options
Temperature alarms with external readouts
Self-closing door swings
Dollies or NSF-listed 3"/6" locking casters
Hospital grade cord with 'green dot' plugs
Stainless steel exterior finishing
Fan-assist options for compact units
Stacking racks to combine units

OPTION: ALARM

Additional Services
Temperature displays in °F or °C
Door reversals
Pyxis-ready doors
Battery Backups

OPTION: PF1KIT

Audible Alarms
Power-out alarms
High/low temperature alarms
Open door alarms

OPTION: KAL

Locking Options
Keyless Access Lock
Battery or AC powered keypad locks
Combination lock with key override

All NIST calibrated equipment
can be re-calibrated after its certification expires by sending the device or probe to our ISO/IEC 17025:2015 certified laboratory

Additional options are available
Contact our product specialists for more information on how we can customize any unit to your facility's precise storage needs

COMING SOON:

HEMOVAULT®
by accucold

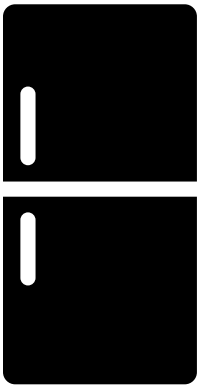

Blood Bank Refrigeration

-86°C

Ultra Low Temperature

Upright Freezers

Performance Series

Full-Sized Refrigerator-Freezer Combinations

Services & Product Support

Accucold's headquarters and value-added manufacturing facilities are based in the United States, with an experienced team of engineers and technicians available to ensure reliable equipment performance in critical settings.
Some of our services include:

Calibration

Temperature monitoring devices can be calibrated and re-calibrated to NIST standards in our ISO/IEC 17025:2017 accredited laboratory.

Preventive Maintenance

Bi-annual and annual services available.
Contact **preventivemaintenance@accucold.com** for additional information

Validation (IQ/OQ)

Installation Qualification and Operation Qualification service available on select items.
Contact **info@accucold.com** for additional information

Customer Support

Accucold technical specialists are always on call to help troubleshoot your equipment.
Our in-house team can be reached at techsupport@accucold.com or **888.4.MEDLAB** ext. **513**

White Glove Delivery

Available on our complete product line through multiple carriers.
For details, contact us at **freightquotes@accucold.com**

CDC & Health Canada Storage Guidelines

Excerpts from the Vaccine Storage and Handling Toolkit
Updated January 2023

NIST Calibrated Temperature Monitoring

CDC recommends this as a minimal action to protect your vaccine supply

CDC Best Practice – CDC recommends best practices as additional actions, practices, and procedures to enhance protection of your vaccine supply.

Vaccine Storage Units: Refrigerator and Freezer Recommendations
There are several types of vaccine storage units available. Purpose-built units are specifically designed to store vaccines.

Use purpose-built or pharmaceutical-grade units designed to either refrigerate or freeze. These units can be compact, under-the-counter style or large. Purpose-built units, sometimes referred to as "pharmaceutical-grade," are designed specifically for storage of biologics, including vaccines.

These units often have:
- Microprocessor-based temperature control with a digital temperature sensor (thermocouple, resistance temperature detector [RTD], or thermistor)
- Fan-forced air circulation with powerful fans or multiple cool air vents promoting uniform temperature and fast temperature recovery from an out-of-range temperature.

Temperature Ranges
Refrigerators should maintain temperatures between 2°C and 8°C (36°F and 46°F)*. Freezers should maintain temperatures between -50°C and -15°C (-58°F and +5°F). Ultra-cold freezers should maintain temperatures between -90°C and -60°C (-130°F and -76°F). Refrigerator or freezer thermostats should be set at the factory-set or midpoint temperature, which will decrease the likelihood of temperature excursions.

Temperature Monitoring Device (TMD)
Every vaccine storage unit must have a TMD. An accurate temperature history that reflects actual vaccine temperatures is critical for protecting your vaccines. Investing in a reliable device is less expensive than replacing vaccines wasted due to the loss of potency that comes from storage at out-of-range temperatures.

CDC recommends a specific type of TMD called a "digital data logger" (DDL).
A DDL provides the most accurate storage unit temperature information, including details on how long a unit has been operating outside the recommended temperature range (referred to as a "temperature excursion"). Unlike a simple minimum/maximum thermometer, which only shows the coldest and warmest temperatures reached in a unit, a DDL provides detailed information on all temperatures recorded at preset intervals.

*** For more information, download the Toolkit at cdc.gov.**

Precise · Stable · Efficient · Whisper Quiet

Accucold is proud to lead the industry with the largest line of cold storage product sizes certified to the NSF/ANSI 456 Vaccine Storage Standard

PHARMA-VAC
PERFORMANCE

Proven Stability

with a purpose-built design to meet the CDC guidelines for vaccine storage
